

Your task is to write UI automation tests for <https://www.bamfunds.com/> using Playwright and Pytest and your solution should be well-structured, easy to run, and include a test report.

Test Scenarios:

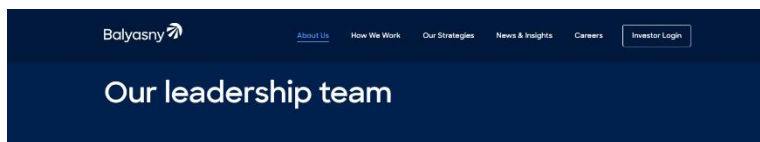

You are required to automate the following 3 scenarios:

1. Founders

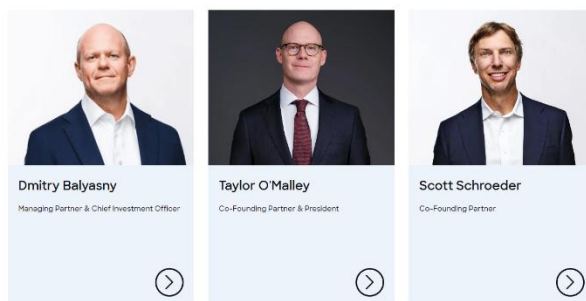

- ★ Hover over “About us” and go to “Leadership”

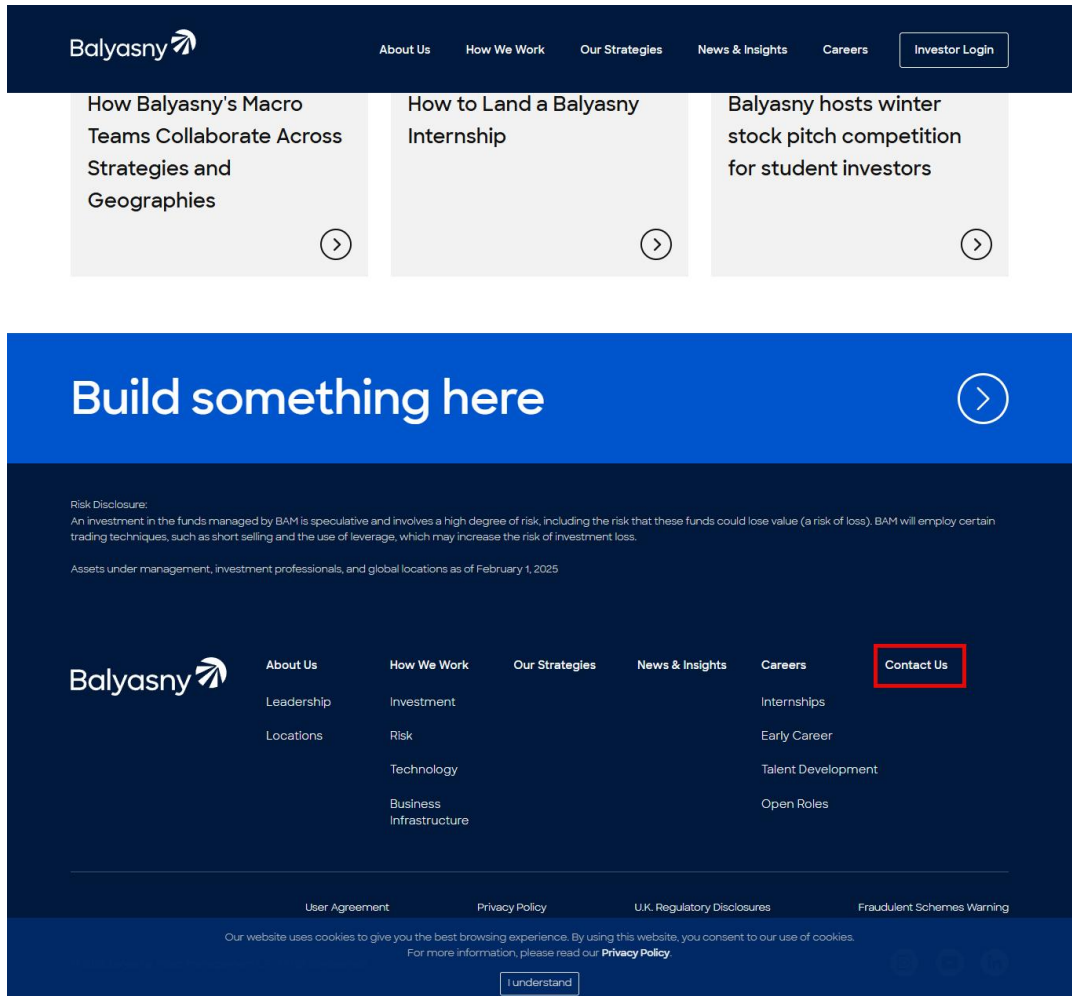

- ★ Check Founders' section (check if all 3 founders names are displayed)

Founders

2. Contact Form Validation

- ★ Check that required fields trigger validation errors
- ★ Test invalid inputs (e.g. wrong email format) and verify correct error messages

3. Candidate-Defined Scenarios:

- ★ Choose 2 additional UI test scenarios of your own
- ★ Clearly describe the test case and expected results

Submission Requirements:

- ★ GitHub Repository: add your test automation project to a repository
- ★ README.md: provide setup instructions, how to run the tests, the browser supported for this test suite (Chrome, Safari, Firefox), mobile devices (iPhone, Android) and any other relevant details.
- ★ Test Report: Generate a test execution report and include it in the repository
- ★ Set up CI for auto tests to run on each push/commit to the repository.
